1980 Census of Housing

HC80-SI-1

Selected Housing Characteristics by States and Counties: 1980

This report presents statistics from the 1980 Census of Housing on general characteristics of housing units for the 50 States and the District of Columbia, counties, and independent cities.

The 1980 census figures for the total United States, not shown in the table in this report, are as follows:

Total housing units	88,396,513
Year-round housing units	86,678,392
Median rooms	5.1
Percent lacking complete plumbing for exclusive use	2.7
Owner-occupied housing units	51,787,104
Lacking complete plumbing for exclusive use	701,058
Median value, specified owner	\$47,200
Renter-occupied housing units	28,591,179
Lacking complete plumbing for exclusive use	1,043,250
Median contract rent, specified renter	\$198
Homeowner vacancy rate	1.8
Rental vacancy rate	7.1

The statistics presented here are being issued in advance of their separate publication in the final report, *Characteristics of Housing Units, General Housing Characteristics*, HC80-1-A.

States. The 50 States and the District of Columbia are the constituent units of the United States.

Counties. In most States, the primary divisions are termed counties. In Louisiana, these divisions are known as parishes. In Alaska, which has no counties, the county equivalents are the organized boroughs together with the "census areas" which were developed for general statistical purposes by the State of Alaska and the Census Bureau. In four States, (Maryland, Missouri, Nevada, and Virginia), there are one or more cities which are independent of any county organization and thus constitute primary divisions of their States. That part of Yellowstone National Park in Montana is treated as a county equivalent. The District of Columbia has no primary divisions, and the entire area is considered equivalent to a county for census purposes.

Housing Units. A housing unit is a house, an apartment, a group of rooms, or a single room, occupied as a separate living quarters, or if vacant, intended for occupancy as a separate living quarters. Separate living quarters are those in

which the occupants live and eat separately from any other persons in the building and which have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements, except those in group quarters. For vacant units, the criteria of separateness and direct access are applied to the intended occupants whenever possible. If that information cannot be obtained, the criteria are applied to the previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that boats, tents, vans, caves, and the like are included only if they are occupied. Vacant mobile homes are included, provided they are intended for occupancy on the site where they stand. Vacant mobile homes on dealers' sales lots, at the factory, or in storage yards are excluded from the housing inventory.

Year-Round Housing Units. Data on housing characteristics in the 1980 census reports are limited to year-round housing units; i.e., all occupied units plus vacant units which are available or intended for year-round use. Vacant units intended for seasonal occupancy and vacant units held for migratory labor are excluded because of the difficulty of obtaining reliable data on their characteristics.

Issued October 1981

82 0604

Counts of the total housing inventory, however, are given for each area presented in this report.

Occupied Housing Units. A housing unit is classified as occupied if a person or group of persons is living in it at the time of enumeration or if the occupants are only temporarily absent, for example, away on vacation. However, if all the persons staying in the unit have their usual place of residence elsewhere, the unit is classified as vacant.

Tenure. A housing unit is "owner occupied" if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. All other occupied units are classified as "renter occupied," including units rented for cash rent and those occupied without payment of cash rent.

Lacking Complete Plumbing for Exclusive Use. A housing unit is classified as "lacking complete plumbing for exclusive use" when it does not have all three specified plumbing facilities (hot and cold piped water, a flush toilet, and a bathtub or shower) inside the unit for the exclusive use of the occupants of the unit.

Derived Figures (Medians, Percents, Etc.). Shown in this report are medians and percents, as well as certain rates and ratios. The median—a type of average—is the middle value in a distribution; i.e., the median divides the distribution into two equal parts: one-half of the cases fall below the median and one-half of all the cases exceed the median.

Median Rooms. Rooms to be counted include whole rooms used for living

purposes. For each unit they include living rooms, dining rooms, kitchens, bedrooms, finished recreation rooms, enclosed porches suitable for year-round use, and lodger's rooms. Excluded are strip or pullman kitchens, bathrooms, open porches, balconies, halls, half-rooms, utility rooms, unfinished attics or basements, or other space used for storage. A partially divided room is a separate room only if there is a partition from floor to ceiling. In computing medians for rooms, the whole number is used as the midpoint of the interval so that, for example, the category "3 rooms" is treated as an interval ranging from 2.5 up to 3.5 rooms.

Median Value. Value is the respondent's estimate of how much the property (house and lot) or condominium unit would sell for if it were for sale. Value data in this report are presented for specified owner-occupied units, which are limited to owner-occupied one-family noncondominium units on less than 10 acres, without a commercial establishment or medical office on the property. Mobile homes, trailers, boats, tents, or vans occupied as a usual residence are also excluded from the value tabulations. Value was also collected for condominium units, but such units are excluded from the table showing median value in this report. Medians for value are rounded to the nearest hundred dollars. If the median falls in the category "Less than \$10,000," it is shown as "\$10,000-." If the median falls in the category "\$200,000 or more," it is shown as "\$200,000+."

Median Contract Rent. Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included.

Rent data in this report are presented for specified renter-occupied units, which include renter-occupied units except one-family homes on 10 acres or more. Medians for contract rent are rounded to the nearest dollar. In computing median contract rent, units reported as "no cash rent" are excluded. If the median falls in the category "Less than \$50," it is shown as "\$50-." If the median falls in the category "\$500 or more," it is shown as "\$500+."

Homeowner Vacancy Rate. The homeowner vacancy rate is the percentage relationship between the vacant year-round units for sale and the total homeowner inventory. It is computed by dividing the number of vacant year-round units for sale by the total number of homeowner units. The total number of homeowner units consists of the owner-occupied units and the vacant year-round units for sale only. Vacant units that are seasonal or held off the market, are excluded.

Rental Vacancy Rate. The rental vacancy rate is the percentage relationship of vacant year-round units for rent to total rental inventory. It is computed by dividing the number of vacant year-round units for rent by the total number of rental units. The total number of rental units consists of the renter-occupied units and the vacant year-round units for rent. Vacant units that are seasonal, or held off the market are excluded.

Symbols Used in Table. A dash "-" represents zero or a percent which rounds to less than 0.1. Three dots "..." mean not applicable or that the data are being withheld to avoid disclosure of information for individuals.

At the time this report was being prepared, potential errors in 1980 population and housing counts were being investigated. These investigations could result in corrections being incorporated before the standard 1980 census data products are released beginning in late 1981.

The 1980 figures shown in this publication are subject to change pending the outcome of the various lawsuits dealing with the census counts.
